

Acrylamide/Bis 29:1

Product Number: AB291

Shipping and Storage

Valid for 12 months.

Description

Acrylamide: Methylene bisamide solution, also known as Acr Bis, is most commonly used. The most commonly used solution is 30% Acr-Bis (29:1), which is an aqueous solution containing 30% Acrylamide Bisacrylamide. The ratio of Acrylamide to Bisacrylamide is 29:1, and the total proportion of acrylamide is 30%.

Acrylamide/Bis 29:1 is often used to prepare acrylamide gel (PAGE gel), including SDS-PAGE gel, etc. It can be used for the separation of protein or nucleic acid, and is a common stock solution in the laboratory.

Protocol

1. Depending on the specific experiment, you can refer to the description of SDS-PAGE gel preparation.

Note

1. Acrylamide/Bis 29:1 has certain neurotoxicity to the human body, please pay attention to appropriate protection.
2. For your safety and health, please wear lab coats and disposable gloves.
