

Donkey anti-rabbit IgG,HRP-labeled

Product Number: ATB5804

Shipping and Storage

Store at -20°C± 3°C.

Description

The donkey anti rabbit IgG HRP complex was prepared by affinity purification of donkey anti rabbit IgG, polyclonal antibody, and labeling with sodium periodate method.

Application

Can be used for scientific research experiments such as POCT, GICT, IHC, ELISA, CLIA, WB, etc.

Specifications

1. Status: Liquid, no denatured sediment.
2. Biological source: Donkey.
3. Specificity: Polyclonal antibodies react with rabbit IgG.
4. After labeling concentration: $\geq 1.0\text{mg/mL}$.
5. Buffer solution: 0.01M PBS+50% glycerol.
6. Working concentration: 1:5000-1:20000.
7. Preservatives: No preservatives added.
8. Validity period: 3 years.

Note

After receiving the raw materials, customers should promptly package them for use or storage to avoid repeated freezing and thawing.
