

Goat anti-mouse IgG, HRP-labeled

Product Number: ATB5805

Shipping and Storage

Store at -20°C± 3°C.

Description

After affinity purification, sheep anti mouse IgG and polyclonal antibodies were labeled with sodium periodate to prepare sheep anti mouse IgG HRP complexes.

Application

Can be used for scientific research experiments such as POCT, GICT, IHC, ELISA, CLIA, WB, etc.

Specifications

1. Status: Liquid, no denatured sediment.
2. Biological source: Goat.
3. Specificity: Polyclonal antibodies react with mouse IgG.
4. After labeling concentration: $\geq 1.0\text{mg/mL}$.
5. Buffer solution: 0.01M PBS+50% glycerol.
6. Working concentration: 1:5000-1:10000.
7. Preservatives: No preservatives added.
8. Validity period: 3 years.

Note

After receiving the raw materials, customers should promptly package them for use or storage to avoid repeated freezing and thawing.
