

Goat hemoglobin

Product Number: BC013

Shipping and Storage

Store at 2-8°C; avoid freezing.

Component

Component	BC013-5g	BC013-10g
Goat Hemoglobin (Powder)	5g	10g

Description

In a closed system, healthy goats undergo sterile blood collection and are scientifically prepared with the necessary anticoagulants added. There are no bacteria, fungi, mycoplasma, or mycoplasma, and no preservatives or antibiotics are added. Sheep hemoglobin is a special protein that transports oxygen within red blood cells. It is a protein that makes sheep blood appear red and is composed of globin and hemoglobin. Its globin component is a tetramer composed of two different pairs of globin chains (α and β).

Application

For biochemical research.

Note

1. If this product is not used in a short period of time, it should be stored in a cool and shaded place (2-8°C storage) away from light
2. All products of our company are only used for medical purposes such as scientific research or industrial applications, and cannot be used for clinical diagnosis or treatment of humans or animals. They are not medicinal or edible.
3. For your safety and health, please wear lab coats and disposable gloves when operating.
