

Goat anti-human IgM,IgG

Product Number: GAH04-14

Shipping and Storage

-20°C± 3°C can be stored for a long time.

Description

Appearance	Liquid, non denaturing precipitate
Specificity	Polyclonal antibodies react with human IgM
Concentration	1.0-25.0mg/ml
Source	Goat
Valence	≥1:2×10 ⁴
Purity	>90% (SDS-PAGE)
Preservative	No preservatives added
Validity period	3 years

Application

1. Efficient purification of sheep anti human IgM and IgG polyclonal antibodies from goat anti human IgM serum using immunoaffinity chromatography;
2. Its immunogen is purified human IgM.
3. Can be used for scientific research experiments such as POCT, GICT, IHC, ELISA, CLIA, WB etc.

Storage buffer

0.01M PBS

Note

After receiving the raw materials, customers should promptly package or store them to avoid repeated freeze-thaw cycles.
