

Human IgG(purified)

Product Number: HI04-08

Shipping and Storage

-20°C± 3°C can be stored for a long time.

Description

Appearance	Sterile packaged liquid
Source	human serum
Concentration	1.0-200.0mg/ml
Molecular weight	150KD
Potency	≥ 1:1×10 ⁵
Purity	>90% (SDS-PAGE)
Preservatives	No preservatives added
Validity period	3 years

Application

1. Efficient purification of human IgG polyclonal antibodies from human serum using affinity chromatography;
2. Can be used for scientific research experiments such as POCT, GICT, IHC, ELISA, CLIA, WB, etc.

Storage buffer

0.01M PBS

Note

After receiving the raw materials, customers should promptly package or store them to avoid repeated freeze-thaw cycles.
