

BsaJI

Product Number: RE01

Shipping and Storage

-20°C.

Specifications

1,000 units

Identifying sites

Activity in different reaction buffer solutions

1. Buffer 1.1: 50%
2. Buffer 2.1: 100%
3. Buffer 3.1: 100%
4. CutSmart Buffer: 100%

Properties

CutSmart、Recombinase

Reaction conditions

CutSmart buffer, 60 °C.

Thermal deactivation: 80 °C for 20 minutes.

Methylation sensitivity

Not sensitive to dam, dcm, and mammalian CpG methylation.

Note

1. BsaJI is a completely homolytic enzyme of *Secl*.
2. Attention should be paid to aseptic operation during use to avoid contamination
3. To maintain the best usage effect of this product, do not perform freeze-thaw treatment.
4. For your safety and health, please wear laboratory clothes and disposable gloves when operating.
5. This product is for scientific research purposes only and cannot be used for medical or diagnostic procedures in humans or animals. It cannot be used as food, cosmetics, or household items. You must comply with all applicable licensing requirements on the product description page when using this product. If the after-sales problems are caused by not following the instructions, our company will not handle them!
6. Disclaimer: Our company will not be responsible for any accidents that may occur during the abnormal use of this product
