

Bromophenol blue

Product Number: ST09

Shipping and Storage

Room temperature

Components

Component	ST09
Bromophenol blue	25mL

Description

Bromophenol blue is a pH indicator whose color changes from yellow to blue at pH 3.0~4.6. It is often used as an electrophoretic indicator dye in gel to indicate the migration of small molecular nucleic acids or proteins. It is a common molecular biological reagent.

Protocol

1. Operate according to the specific requirements of the experiment.
2. For your safety and health, please wear laboratory clothes and disposable gloves for operation.
